creation**

Camelot MDG Accelerators

Speed up your SAP Master Data Governance implementation and application maintenance

- ▶ Improve overall data quality
- ▶ Increase user experience
- ▶ Efficiently react on changing requirements

At a glance: Camelot's MDG Accelerators let you adapt, extend and maintain your MDG solution on multiple levels

Camelot's MDG Accelerators are a ready-to-deploy solution and can be set up in your system environment with a standardized process. This means the overall implementation time can be decreased.

With our solution we also have the agility of projects in mind and are able to react on changing requirements.

A lean and adaptive UI does not only increase the user experience but also their acceptance of the new system. With that in mind, Camelot developed a highly adaptive UI framework. Within this framework you can react on several defining factors: creating a base UI, adapting the UI layout during the master data maintenance process and display data according to the user's business function.

Only with high quality master data you can ensure that operational processes run seamlessly. To support you in reaching this goal our business rule framework enables the automatic derivation of field values, validates the correctness of new and existing data, and supports the user in choosing the correct data by limiting the field selection.

In addition, all of these rule frameworks are usable across single, mass, and interface processing of master data.

Each company uses and maintains master data differently. To overcome this obstacle Camelot provides a highly customizable and adaptable solution framework.

With a focus on flexibility the initial set of requirements is implemented efficiently, as well as future scope extensions during and after the implementation.

A comparison to the SAP standard solution highlights the benefits of the Camelot MDG Accelerators

SAP STANDARD

CAMELOT MDG ACCELERATORS

DATA QUALITY

- ▶ Standard validations and rules
- ▶ One size fits all
- ▶ Either run data quality rules or not at all

- ▶ Easy integration into the SAP standard
- ▶ Custom rules that reflect specific needs of the company
- ▶ Workflow dependency, rules executed at the right time

USER EXPERIENCE

- ▶ Static definition of field conditions
- ▶ Overloaded UI that displays too much information for the regular user
- ▶ Limited possibilities in adapting UI in the workflow

- ▶ Dynamic definition on field conditions
- ▶ Create a basic UI that has the user's business function in mind
- ▶ Enrich field condition with workflow information

FLEXIBILITY AND EXTENSIBILITY

- ▶ Standard solution with defined scope
- ▶ Custom extensions are not in scope of standard validations
- ▶ Exceptions for custom extensions are done explicitly and on one by one basis

- ▶ Ready-to-use solution with direct integration into the SAP standard
- ▶ Plug-and-play concept of custom extensions that integrate into the whole framework
- ▶ Quick realization of requirement changes and reaction exceptions

BESIDES THE CAMELOT MDG ACCELERATORS YOU CAN FURTHER BENEFIT FROM OUR OTHER READY-TO-USE SOLUTIONS

WORKFLOW

- ▶ Dynamic determination of receivers/agents
- ▶ Integrated email notification
- ▶ SLA reporting (e.g. reminders or finalization of open items)

DATA QUALITY

- ▶ Connection to external address enrichment services
- ▶ Integration of data validation services
- ▶ Migration validation service

USER EXPERIENCE

- ▶ Enhanced functionality to selectively copy data
- ▶ Digital signature for approving master data changes
- ▶ Generic extension of lists by non-standard information

About Camelot ITLab GmbH

Camelot Innovative Technologies Lab (Camelot ITLab) is the leading SAP consultancy for digital value chain management. With more than 20 years of experience Camelot ITLab leads clients in their digital transformation. Our capabilities range from the strategic dialogue around current challenges in the digital world to the implementation of the new, digital solutions. As part of CAMELOT Group with 1,800 employees worldwide, Camelot ITLab stands for customer orientation, innovation, highest quality and feasible end-to-end solutions. From innovations to solutions.

Why Camelot

Widespread expertise in deploying and implementing MDG

Complement standard MDG with our rich expertise in providing master data services

Empower your master data maintenance solution with Camelot's MDG Accelerators
